#### The Tarisf and Land Rill.

The Rochester Democrat is in a dilemma; but it will not escape from it by understanding what we said of the action of Congress on the Tariff bill now pending as referring to the "Little Tariff bill." Our paragraph which he quotes had no reference to the latter but to the former, as any one must see. Our ground on the subject is this: We mointain that Congress has no business to infer, from Mr. Tyler's outrageous Veto on the 'Little Tariff bill, that he will Veto such a Tariff as may now be passed, and act upon that presumption. The majority should go straight forward and pass such a bill as they believe demanded by the highest good of the country; if the President vetoes that, it will be time enough then to pass such a re as they do not approve. To bow to the One-Man Power when we must, is bad enough; but to commence ducking and bobbing a mile off from apprehension of it, argues a humiliation of spirit which we have not reached, and cannot takes," which the Democrat talks of, are its own, founded on its extraordinary misconstruction of our

The Democrat unfairly states the practical part of the question at issue. It is not- Shall we refuse a Tariif, unless the President will give us Distribution with it I '-but- Shall we surrender the Land Distribution which we now have, in the hope of getting a better Tariff, of which we have no assurance whatever t '-The Land Distribu- He is to be in Buffalo next Tuesday. tion is a law, solid and secure; only a provise enrafted upon it by Loco-Free and Southern Free Trade votes, stipulates that whenever the Tariff is naised above twenty per cent, the Distribution shall be suspended. Against this clause we and the great moss of the Whigs, including those in Conress, protested and fought; we were outvoted i in the Scante; and the House, rather than want the bill, acquiesced, but with the distinct wowal that we would not be concluded by it. 1. Because the President and his satellites have no right to threaten a Veto beforehand, or Congress to regard the threat. When Van Buren gave arthuest from the Whig press, including many who would have approved the act threatened, but spurped the despetic threat. Have we

2. Because the Land question involves a Right of Property worth at least \$100,000,000. Waive the Distribution now, and a largely increased representation of the Squatter interest is poured into the next Congress, ready to bargain their votes for President or any thing else for a Cession to the soveral new States or a Graduation of the price of the Public Lands. The result will probably beprovided the Land Distribution is now surrendered. the Old States not feeling may direct and palpable interest in the Lands, and therefore not keeping a that the Lands will be squandered away by Graduntion or Cession within four years hence. The

Rives of Va. and Henderson of Miss., are Free Trade men; and they may razee the bill in the Senate, if not in the House But there are many Whigs in the House-inclu ding most of the Kentucky, Indiana and part of the Ohio Delegation-who will deem a surrender of the Land Distribution by their Whig friends a flagrant breach of good faith, an abandonment of sound policy, and a shameful trackling to Executive Power, and on these grounds will feel constrained to vote against the bill. Where shall we for six days ending Saturday, July 7, are as follows: For passengers, \$6.625 ; for freight, mail then made for Mr. Wingas; officers went to the not tell. 4. But, supposing such a one could be passedthe Land Distribution being surrendered-we are not at all confident that John Tyler would not Veto it. How can we be? He demands a Rescause for the public reception of Jons Quiscr Adams the gun most have been near to his face. Pariff, and admits Protection only as incidental to on his return from Washington at the close of the Reverse Now we may safely affirm that a duty Congressional Session of twesty per cent. on Woolen Goods will yield more Revenue than one of forty; yet the best interests of the Country clearly require the latter. Suppose Congress adopt it, in the face of the deadly hostility of the Loco-Focos, of Mr. Wise and his file of the Guard. bility in even a good. Tariff, under the hard terms. tire Whig City Ticket is elected, as follows: which Mr. Tyler seeks to impose. The instant it should restore prosperity to the Country, there will inevitably be large purchases of Public Lands—say \$10,000,000 to a recommend their down must get \$10,000,000 to a recommend the Vinc Floriors of this State, at the ensuing election, and to amost such other business as may be deemed proper by \$10,000,000 in a year—and then down must go the Taciff, and all be at sea again. Without the Convention in their respective counter, and appoint Land Distribution, there can be no stable, efficient elegates to be State Convention, and the Central Protection. Let more think the twain can be severed.

"We enly ask our friend of the Tribane this pain question: Will he advise Congress to Pass so Tables Bill unless Distribution is Giorgous Victory.—Never CONNECTED WITH IT!
